

an isolated DNA
--11 (amended). ~~A DNA~~ molecule comprising the nucleotide sequence coding for [the TNF Binding Protein TBP-II of claim 1 or to a protein homolog therewith] ~~a protein having an amino acid sequence substantially corresponding to~~ ^{consists of naturally occurring} Tumor Necrosis Factor (TNF) Binding Protein II, herein designated TBP-II, said TBP-II including the amino acid sequence: Thr-Pro-Tyr-Ala-Pro-Glu-Pro-Gly-Ser-Thr, said protein having the ability to inhibit the cytotoxic effect of TNF and/or to maintain the prolonged beneficial effects of TNF.

12 (amended). A replicable expression vehicle comprising the DNA molecule of claim 11 and capable, in a transformant host cell, of expressing [the TNF Binding Protein TBP-II of claim 1] said protein.

the of
14 (amended). A process for producing a protein having an amino acid sequence substantially corresponding to TNF Binding Protein TBP-II, comprising the steps of: (a) culturing a transformant host cell according to claim 13 in a suitable culture medium, and (b) isolating said [TNF Binding Protein TBP-II] protein.

Insert new claims 33-45 as follows:

--33. A DNA molecule in accordance with claim 11, wherein said protein consists of TBP-II.

~~34. A DNA molecule in accordance with claim 33, wherein said protein consists of human TBP-II.~~

an isolated DNA
35. ~~A DNA~~ molecule comprising the nucleotide sequence ^{naturally occurring human} coding for a Tumor Necrosis Factor (TNF) binding protein (TBPII) having the following characteristics:

- 50B H3
C F
- i. an N-terminal amino acid sequence: Xaa-Pro-Tyr-Ala-Pro-Glu-Pro-Gly-Ser-Thr, where Xaa consists of the following amino acid sequences: Thr, Val-Ala-Phe-Thr, ^{Gln}Ala-Glu-Val-Ala-Phe-Thr and Phe-Thr; and
- ii. the ability to inhibit the cytotoxic effect of TNF- α on murine A9 cells.

G

36. ^{an isolated DNA}~~A DNA~~ molecule comprising the nucleotide sequence ^{naturally occurring human} coding for a Tumor Necrosis Factor (TNF) binding protein (TBPII) having the following characteristics:

- 50B H3
C F
- i. an N-terminal amino acid sequence: Xaa-Pro-Tyr-Ala-Pro-Glu-Pro-Gly-Ser-Thr, where Xaa consists of the following amino acid sequences: Thr, Val-Ala-Phe-Thr, ^{Gln}Ala-Glu-Val-Ala-Phe-Thr and Phe-Thr;
- ii. the ability to inhibit the cytotoxic effect of TNF- α on murine A9 cells; and
- iii. a molecular weight of about 30kd in reducing SDS-PAGE analysis.

H C F

37. A replicable expression vehicle comprising the DNA molecule of claim ¹¹³⁶⁵¹33 and capable, in a transformant host cell, of expressing said protein.

C

38. A host cell selected from ^{the group consisting of} a prokaryotic and a eukaryotic cell transformed with the replicable expression vehicle of claim 37.

C C

39. A process for producing a protein having ^{the} an amino acid sequence ^{of} ~~substantially corresponding to~~ TNF Binding Protein TBP-II, comprising the steps of: (a) culturing a transformant host

cell according to claim 38 in a suitable culture medium, and (b) isolating said protein.

40. ~~A replicable expression vehicle comprising the DNA molecule of claim 34 and capable, in a transformant host cell, of expressing said protein.~~

41. A host cell selected from ~~a prokaryotic and a eukaryotic cell transformed with the replicable expression vehicle of claim 40.~~ *the group consisting of*

42. A process for producing a protein having ~~an amino acid sequence substantially corresponding to~~ *the* TNF Binding Protein TBP-II, comprising the steps of: (a) culturing a transformant host cell according to claim 41 in a suitable culture medium, and (b) ~~isolating said protein.~~ *of*

43. A replicable expression vehicle comprising the DNA molecule of claim 35 and capable, in a transformant host cell, of expressing said protein.

44. A host cell selected from ~~a prokaryotic and a eukaryotic cell transformed with the replicable expression vehicle of claim 43.~~ *the group consisting of*

45. A process for producing a protein having ~~an amino acid sequence substantially corresponding to~~ *the* TNF Binding Protein TBP-II, comprising the steps of: (a) culturing a transformant host cell according to claim 44 in a suitable culture medium, and (b) isolating said protein.--
